A new Proposition 13 A new Water Proposition

Proposition 13 on the November ballot will:

- Establish a statewide goal — to end wasteful and inefficient uses of water in California.
- Require bureaucrats in water districts throughout California to develop and implement water conservation and management plans before there is a crisis.
- Protect our remaining public streams and rivers against being totally dammed and diverted for private use.
- Create fair water pricing by phasing out the use of property taxes for water subsidies.
